// We develop software with passion!

With our software, banks can execute transactions faster, airports can provide new digital services for their passengers, car manufacturers can produce more effectively, or telecommunications companies can roll out the new 5G technology smoothly. We offer individual development opportunities and exciting tasks in an international environment.

We are looking for a

// Frontend Developer (m/f/d)

to strengthen our team in Timisoara. Shape the digital future with us!

Exciting tasks await you:

- Technical Design and Implementation: **Develop database-supported software solutions in the field of IT service and configuration management.**

- Feature Development: **Create new features for innovative software products.**

- Requirements Analysis and Specification: **Collaborate closely with the Product Owner to analyze, specify, and develop requirements.**

- Continuous Improvement: **Contribute to the ongoing enhancement of software design and development processes.**
  With this you inspire us:

- Educational Background: **Successfully completed degree in information technology, mathematics, natural sciences, engineering, or economics.**

- Front-End Development Experience: **Proficient in Angular 13 framework, Redux, Typescript, CSS/SCSS, HTML.**

- User Interface Support: **Develop and implement front-end architecture to support user interface concepts.**

- SaaS Knowledge: **Familiarity with SaaS cloud-based solutions is a plus.**

- Software Development Models: **Basic understanding of procedural models for software development projects.**

- Analytical and Conceptual Thinking: **Strong analytical and conceptual thinking skills, coupled with the ability to work effectively as part of a team.**

FNT Technology and Methodology Environment and Benefits:

Frontend: Angular 13 framework // Backend: JAVA EE / Java Framework // Spring / Quarkus // Container-Tools (e.g. Docker and Kubernetes) // Databases (e.g. Oracle and PostgreSQL) // Agile way of working using Scrum/Kanban
