

// We develop software with passion!

With our software, banks can execute transactions faster, airports can provide new digital services for their passengers, car manufacturers can produce more effectively, or telecommunications companies can roll out the new 5G technology smoothly. We offer individual development opportunities and exciting tasks in an international environment.

We are looking for a

## // Senior Software Developer (m/f/d)

to strengthen our team in Timisoara. Shape the digital future with us!

### Exciting tasks await you:

- You are responsible for the conception, implementation and testing of basic functionality and functionality for a modern web application based on Java, HTML5 and Angular
- With your passion you contribute to the continuous development of the software architecture
- You work closely with product managers and product owners in the context of requirements analysis, specification and development
- You support quality assurance and the optimization of systems
- You enjoy sharing your knowledge with your team colleagues and coaching juniors
- You see the opportunity for further development as a Software Architect (m/f/d) or Lead Developer (m/f/d) as an option

### With this you inspire us:

- Degree in computer science or comparable knowledge acquired in practice
- Many years of experience in the development of modern web applications in Java with Spring or JEE
- Reliable team player with a high understanding of quality and enjoy interacting with team members
- A high level of commitment and hands-on mentality
- Good knowledge of German and English

### FNT Technology and Methodology Environment and Benefits:

JAVA EE / Java Framework // Spring / Quarkus // Container-Tools (e.g. Docker and Kubernetes) // Databases (e.g. Oracle and PostgreSQL)  
// Agile way of working using Scrum/Kanban
